PATRICK SANG

sangpatrick211@gmail.com |+254795303969| https://patrick-sang.is-a.dev/

PROFFESIONALS SUMMARY

A geospatial developer skilled in GIS,remote sensing,spatial data analysis,experienced in developing interactive GIS applications,managing spatial databases and building GIS solutions using modern web technologies.Knowledgeable I cloud-based GIS ,geospatial automation, with focus on developing practical solutions for real-world challenges.

PROFFESIONAL EXPERIENCE

GIS Trainer -KijaniSpace(part-time) **April** 2026-Present

Delivers practical training in Geographic Information Systems(GIS),covering spatial data management,mapping and geospatial analysis.
Train participants in Earth Observation(EO) and remote sensing,focusing on satellite imagery and its application in agriculture.
Facilitate hands on training on the Space-IoT Box platform,guiding learners in accessing,exploring and interpreting spatial datasets and satellite- derived information.
Demonstrate the integration of GIS ,satellite data in precision agriculture and aquaculture.
Guide learners in interpreting satellite imagery,vegetation indices and Earth Observation products for agricultural monitoring and decision making.
Mentor participants through practical exercises and project based learning,strengthening their ability to apply GIS to real-world challenges.

GIS analyst -Micro1.ai (Remote) 2025 -present

Analyse,process and interpret spatial datasets to support location intelligence,and data analysis projects.
Validate,clean,and organize geographic data from satellite imagery ,Remote sensing products,GPS Surveys and other spatial data sources.
Perform Spatial analysis using QGIS to identify patterns,trends,relationships with geographic datasets.
Create ,edit and validate spatial annotations,map features and location-based datasets to support model training and evaluation.
Develop thematic maps,spatial visualizations and outputs supporting data-driven decision-making
Document data-processing procedures and maintain quality standards across project deliverable.

EDUCATION

Maseno University 2020-2024

Bachelor of Science (with IT)

Second Class Honors, Upper Division.

University of Nairobi 2026-ongoing

Master of science In Geographic Information Systems

CORE COMPETENCIES & SKILLS

Languages:Python,Javascript,R,SQL

Databases: PostgreSQL,PostGIS,DuckDB(Spatial+H3extensions),AWS RDS

GIS &Mapping:QGIS,MapLibre GL JS,Leaflet,Folium,Kepler.gl,Deck.gl,Overture Maps.

Dashboard & BI:Dash &Power BI.

Remote Sensing:sentinel-2,Google Earth Engine,MODIS,Spectral Indices,Landsat.

Modelling:XGBoost,Spatial Regresion(PySAL),Suitability Scoring.

LANGUAGES

English(Fluent) Swahili(Native)

CERTIFICATIONS

Esri ArcGIS Developer Certification-from ESRI-(2023)
